PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience in software development across the entire software development life cycle (SDLC), specializing in high-performance frontend architectures, secure client-side integrations, and backend services. Proficient in designing scalable user interfaces and microservices using React, Next.js, and Node.js. Experienced in database design, secure authentication workflows, payment gateway integrations, and client-side application deployments.

EDUCATION

Ajay Kumar Garg Engineering College

August, 2019 - May, 2023

Bachelor of Technology (B.Tech) in Computer Science & Engineering (Ghaziabad, India)

Courses: Operating Systems, Data Structures, Database and Management System, Computer Networks, Object Oriented Programming

EXPERIENCE

Scizers Technologies LLP (Remote)

March 2024 - Present

Software Engineer

- Developed and optimized web applications using React and Next.js, translating Figma design wireframes into modular, responsive UI components to improve PageSpeed and Lighthouse scores by 30%.
- Implemented secure client-side OAuth2 and JWT-based authentication flows in Next.js applications, protecting sensitive user data and reducing session vulnerabilities by 35%.
- Engineered secure payment gateway integrations (Razorpay and CCAvenue) within Next.js API routes and checkout workflows, processing 2,000+ monthly transactions with zero data loss.
- Engineered integrations for customer relationship management (CRM) systems and travel OTA platforms, incorporating airline distribution API modules to improve booking flow latency by 20%.
- Designed and built an advanced tables module featuring server-side pagination, multi-column filtering, sorting, and memoization (React.memo, useMemo) to reduce rendering lag by 45%.
- Created interactive administrative dashboards and data visualization tools using Chart.js, providing clients with real-time audit logs and metric monitoring interfaces.
- Optimized frontend bundle sizes through code-splitting, lazy loading, and asset compression, reducing initial page load times by 35%.
- Integrated client-side state management using Redux Toolkit to synchronize state across complex multi-step workflows, improving user navigation efficiency by 20%.
- Collaborated closely with UX designers, product managers, and backend engineers in Agile/Scrum sprints, utilizing Git for structured version control and code reviews.
- Investigated frontend performance bottlenecks and client-side error logs, resolving layout shifts and memory leaks to improve application uptime by 20%.
- Led the end-to-end development of moderately complex user interface features, demonstrating technical initiative and craftsmanship to meet business requirements.

PROJECTS

- Movies-n-Pop:** Built a responsive movie discovery web app using React, Redux Toolkit, and SCSS, integrating TMDB REST APIs. Optimized client-side caching, dynamic filtering, and mobile-first responsive layouts, eliminating ad latency to increase user session duration by 40% and mobile engagement by 50%.
- FlexBox Froggy Clone:** Engineered an interactive web-based CSS learning platform featuring 24 dynamic coding challenges with real-time UI rendering. Implemented HTML5 LocalStorage for seamless user state persistence, automated hint evaluation algorithms, and enhanced user completion rates by 30%.

TECHNICAL SKILLS

- Programming Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, C++
- Libraries & Frameworks:** React.js, Next.js, Redux Toolkit, Node.js, Express.js, Socket.IO, Tailwind CSS, Ant Design
- Databases & Cloud Platforms:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB), Firebase
- Developer Tools & Methods:** Git, GitHub Actions, Jenkins CI/CD, JWT, REST APIs, Agile/Scrum

ACHIEVEMENTS

- Solved 300+ Data Structures and Algorithms problems across multiple competitive coding platforms.
- Delivered one-on-one online lectures globally to aspiring developers in JavaScript and React to support their personal development goals.
- Worked as a freelance graphic designer with a focus on logo design; won 5+ international design contests, driving creative innovation.
